Projects

Online-Voting-System | PHP, SQL, CSS, XAMPP

Mar 2024

- The Online Voting System is a web application developed using PHP and SQL designed to facilitate secure and efficient electronic voting. This system allows users to register, log in, and cast votes in various elections. It also includes an administrative interface for managing elections, candidates, and viewing real-time voting results.

School-Bus-Tracker App | Java, Android Studio, Firebase

Aug 2022

- Android app hello This app is my first android project, as the name says its a school bus tracker for parents and school to monitor thier children and students respectively. By providing accurate GPS-based tracking, this app enhances the safety and security of students, giving peace of mind to parents and efficient control to schools.
